Software Engineer with experience in Laravel, VueJS, MySql, among others. Professional and focus, love exploring new technologies and share it with other. I'm looking for an opportunity to develop my skills and increase my experience in a promising environment and team spirit.

EXPERIENCE

ES Tech Group – Team Manager | Software Developer

Out 2022 – On going

Development and maintenance of our core platform, delivering new features, resolving bugs, and refactoring existing code.

Implementation of integrations with multiple ERPs and third-party APIs (examples: NetSuite, Red Falcon, BMI). Enhancement of internal tools like DIY solutions and swap functionalities, while supporting client needs and participating in technical discussions.

ENOVO – Full Stack Developer

July 2021 – Out 2022

Development and maintenance of Enovo main software, creating new features, fixing bugs and refactor existing code. Development of online shops integrating with APIs (example Stripe, Sage, Skynet). Creating designs for websites and providing client follow-up.

PROGRAMMING LANGUAGES & KNOWN TECHNOLOGIES

PHP (Laravel V12 - V4)

Javascript (+jQuery, VueJs, Alpine)

Livewire

AWS – Amazon Web Services

CSS(Bootstrap 5, 4 & Tailwind)

MySql, PostgreSql, MariaDB

Design Patterns

ATTRIBUTES

Team Projects &

Communication

Programming Oriented to

Objects

Error Handling

Systems Analysis

Bilingual (Portugues, English)

Driver's License

ENOVO - Internship

March 2021 - July 2021 · 5 meses

Design and development of a dynamic Help Center, frontend and backend with backoffice, allowing to control users' actions, personalize pages (articles), rates, recommendations and including a complex search.

PROJECTS

Help Center

Internship in Enovo

Dynamic web-based Help Center made with Laravel, jQuery and bootstrap, with the purpose of educating clients, so they can learn how to use Enovo's main software product, allowing them to self-serve. The Help Center has built in tools for creation, maintenance, removal and monitorization of articles and more, that are easy to use by any admin.

Experience acquired

- | | | |
|----------|------------|----------|
| •Laravel | •Php | •MySql |
| •jQuery | •Bootstrap | •AdobeXD |

DRT (Demand Responsive Transport)

Integrated Project

Android application and Database optimized with the aim for request a transport service to the city of Viseu. Requested by the Municipality of Viseu, the DRT project consists of a transport service with schedules and routes defined based on the citizens' needs.

With this project I developed a vast knowledge of Java programming app and NodeJS functionalities, creating a backend, used in connection to the Database.

Experience acquired

- | | | |
|-------|-----------------|-----------|
| •Java | •MySql | •AdobeXD |
| •XML | •Android Studio | •Teamwork |

EDUCATION

Escola Superior de Tecnologia e Gestão de Viseu

Portugal, Viseu — Bachelor's Degree in Software Engineering

2018 - 2021

Principal Subjects

- | | | |
|----------------------|-------------------|-----------------------------------|
| • Web Development | • Web Design | • Integrated Project |
| • Database Structure | • Database Design | • Programming Oriented to Objects |
